

Additional PrintSmart solutions

Brother's mobile printing solutions are part of our PrintSmart portfolio, a range of print related solutions that help to optimise and control your print environment.

The solutions below offer added benefits including print fleet optimisation and user management to ensure increased productivity and reduced costs.

Managed Print Services (MPS)

MPS from Brother offers a simple way to manage print in your small or medium business. With a fully transparent system of leasing or paying for the latest Brother printers or supplies, you can choose the type

of service you require – helping you better control printing costs, and free up time for you to concentrate on more important aspects of your small or medium business.

Balanced Deployment

In organisations where larger centralised copiers are used, their location may cause staff to waste time walking to, and waiting at, those devices, resulting in a loss of productivity. Balanced Deployment takes a more considered approach to maximise productivity and minimise costs.

We look at floor plans, staff movement and user behaviours to create a more balanced approach; a network of individually connected and multi-function devices with larger machines to print big jobs and smaller machines for more efficient day-to-day printing.

b-guard Standard & Professional

b-guard Standard

Provides small and medium businesses with cost control, reporting capability and monitoring of all Brother and third party devices.

b-guard Professional

Combines all the benefits of our Standard package, with added security features such as pull printing, mail-to-print and scan direct.

PrintSmart Mobile

Smarter business thinking

The move towards mobility

A recent study by IDC projected that mobile workers will account for 75% of the total workforce in 2018. As mobile device adoption increases, so will demand for printing from mobile devices – especially through mobile applications.

How can PrintSmart Mobile help?

PrintSmart Mobile is a cloud-based printing solution developed by Brother that provides simple print access for employees and guests. Powered by PrinterOn – a global leader in mobile printing solutions – PrintSmart Mobile is perfect for any small or medium business (SMB) with a mobile workforce or Bring Your Own Device (BYOD) initiative. PrintSmart Mobile allows users to print from their mobile devices to a Brother printer, without having to return to their desks to connect to networks.

With PrintSmart Mobile, your business will benefit from:

- Simple deployment
- Extensive platform support
- Secure printing
- Reduced IT calls

“

Mobile workers and office staff often need a simple way to print quickly while on-the-go. PrintSmart Mobile addresses this issue and allows secure printing from their mobile devices.”

MFC-8950DWT

Printing – anytime, anyplace

The Brother PrintSmart Mobile solution transforms the way SMBs operate. Mobile workers, office staff and guests are given the capability to print from any mobile device – quickly, simply and securely.

Key benefits of PrintSmart Mobile

Secure Printing

Securing confidential company information is a vital practice for all SMBs. PrintSmart Mobile uses a secure pin release mechanism so that authentication is required at the Brother printer and only the user who sent the print job can collect the document.

Mobile Printing

Employees can print on-the-go and clients and suppliers can enjoy simple, convenient guest printing when they are at your office.

Flexible Printing

There are a range of mobile devices and operating systems used in SMBs and PrintSmart Mobile supports printing from Android, iOS, Blackberry, Windows, Kindle and Nook.

“

The Brother PrintSmart Mobile solution offers major benefits to your small and medium business such as increased employee efficiency, flexibility and print security.”

4 simple ways to print with PrintSmart Mobile:

Email Printing

Send an email to a secured email address with what you want to print attached; then key in the release code emailed back to you to print the document.

Web Printing

Open your browser and enter the address of the web printing portal and follow the simple directions to upload your document; then key in the code displayed to release your documents.

Mobile Printing Apps

PrintSmart Mobile apps are available on BlackBerry, iOS and Android devices to allow users to easily search for and print to all PrintSmart Mobile enabled printers.

PrintWhere® Driver

Print directly from within any Windows application using the standard “File, Print” commands.
